
Hi there! I'm Johan. I'm a designer, developer, thinker, writer, and builder. I have an intense passion for piecing things together, and seldom limit myself to a single area. I love building helpful, important, and lasting things, communication and lean teams, learning new things and how to apply them. I believe in hard work, building bridges, and lighting fires. I'd love to tell you more sometime. Until then, read my story at johanbrook.com/about.

EXPERIENCE SO FAR

Lookback lookback.io 2014.08-present

I joined Lookback in 2014 as first employee, where I'm mainly responsible for the web product. I've developed in **remote work**, communication, and fast paced startup environment.

Spotify spotify.com 2014.01-2014.12

Student ambassador at Chalmers. Arranged events (mainly **hackathons**), recruiting, and employer branding.

Chalmers chalmers.se 2012.08 & 2013.08

Tutor and TA in introductory programming and web applications. Used **pedagogical** skills, and learned a lot about the techniques of studying.

Xdin alten.se 2012.04-2012.08

Consultancy in web development and interaction design. Worked with **Volvo** in developing a touch interface for iPad in upcoming concept car. Also designed and developed a web interface for **SCA**.

Freelancer johanbrook.com 2010.10-present

In web design and development, as well as graphic design. Worked with studios and made stuff for **Sony Ericsson**, by developing and designing websites and mobile apps.

EDUCATION IN SCHOOLS

Bs.c in Software Engineering 2011-2014

at Chalmers University of Technology.

Strong focus on all kinds of programming, mathematics, and project management.

Secondary education 2006-2009

at Sandvikens Gymnasieskola.

Technical program with focus on information technology and software.

TOOLS & TECHNOLOGIES

I like mainly front-end web development, involving:

- + NodeJS
- + Meteor.js
- + MongoDB
- + Ruby on Rails

Generally, I try to pick the **right tool for the job**. Recently, I've discovered the wonders of **functional reactive programming**, which I enjoy. I value the usual stuff: version control, agile methodologies, code discussions, testing, and *clean code*.

I love travelling, cooking, tech trends, and music (who doesn't?). During working at Starbucks in Canada during 2009-10, I discovered how much I enjoy coffee. I'm currently living the nomadic life on the road while working remote. Say hello :)
